// TECHNICAL SKILLS

C# ASP.NET

.NET Framework

Windows Forms ADO.NET

RESTful APIs SQL Server

Git Data Structures

// EDUCATION

B.Sc. in Computer Science / Software Engineering

Al-Sham Private University, Damascus

Final Year · Expected 2026

// LANGUAGES

Arabic – **Fluent**

English – **C1**

// SUMMARY

Backend .NET Developer with 1–3 years of hands-on project experience building desktop and web applications with C#, ASP.NET, and SQL Server. Completed 24+ specialized courses in backend development and programming, and competed in multiple ICPC contests, sharpening algorithmic thinking and problem-solving under pressure. Comfortable working across the full backend stack, from database design and ADO.NET data access layers to RESTful API development.

// PROJECTS

UniPlan — Academic Scheduling Platform

github.com/QFM-Company/UniPlan

A scheduling and academic planning system that helps university students build optimal semester schedules while giving university administration data-driven insight into student demand for specific subjects. Built an admin desktop client and a student-facing client (in development).

C# .NET SQL Server ADO.NET .NET Desktop (Admin)

React (Student, in progress)

DVLD — Driving License & Vehicle Management System

github.com/Fares-knight-2005/Vehicles-License-Project

A comprehensive desktop application for managing driving licenses, test appointments, and vehicle-related administrative tasks, built on a robust multi-layered architecture for scalability and maintainability.

.NET Framework Visual Studio SQL Server (SSMS)

ADO.NET Data Access Layer Code Generator

github.com/Fares-knight-2005/The-Code-Generater-Of-ADO.Net-Database-Layer

A developer tool that auto-generates SQL Server CRUD queries for the Data Access Layer, speeding up boilerplate database code when working with ADO.NET in C# projects.

C++

// COURSES & CERTIFICATIONS

- SQL Server — Database Design & Querying
- .NET Framework & ASP.NET Development
- Data Structures & Algorithms
- RESTful API Development
- Backend Development with .NET

Completed 24+ courses in programming and backend development in total.
